Requisition

Functional Group= RN

Purpose: This Draft Standard for Trial Use contains the format and establishes the data contents of the Requisition Transaction Set (511) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to requisition needed material and equipment from a supply distribution system for immediate consumption or stockage against projected requirements. The originator can also use this transaction set to inquire about the status of, amend, or terminate the original requisition. This transaction set may be used to convey a description and quantity of the required material, delivery and billing information, and other logistics information necessary to evaluate and meet the material needs of the originator. This transaction set is not used to establish a contractual relationship between trading partners, and may precede the use of a purchase order.

Federal Note:

- 1. Organizations use this transaction set to order items of supply, to refer transactions to another supply source for processing, and to transmit misrouted transactions between supply sources.
- 2. Use a single occurrence of this transaction set to transmit single or multiple requisitions to one or more supply sources.
- 3. A single transaction set may contain a combination of requisitions for standard and nonstandard material.
- 4. DoD logistics users should refer to the Defense Logistics Management System (DLMS) Supplement to the Federal Implementation Convention (IC) available at URL: http://www.dla.mil/j-6/dlmso. The DLMS Supplement provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.

DLMS Note:

- 1. Requisitions for material to be provided as Government Furnished Material (GFM) to commercial contractors, requisitions for excess government owned plant property, and requisitions from foreign governments for material to be provided in support of Security Assistance (SA) contain distinguishing requirements which do not apply to non-GFM or non-SA requisitions.
- 2. Users operating under the Defense Logistics Management System (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table, Transportation Mode of Shipment Conversion Table, and the Accounting Classification Appendix which can be found on the Defense Logistics Management Standards Office (DLMSO) web site at www.dla.mil/j-6/dlmso.
- 3. This DLMS Supplement to the Federal 511R implementation convention contains:
- a. Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with DLMSO prior to use.
- b. Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
- c. Defense Logistics Standard System (DLSS) data which must be retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS/DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with DLMSO for early termination (or retention) of specific data requirements for users operating in a full DLMS environment.
- d. Data elements which have an expanded field size above existing DLSS capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with DLMSO prior to use.
- e. Data required to accommodate Component-unique transaction requirements (example: C-series transactions). Data does not apply to DLSS transactions.
- f. Data associated with a DLMS enhancement authorized for implementation by modernized systems under DLMS migration. This data (including expanded field sizes) should be adopted during, or subsequent, to modernization when applicable to the Component's business process. Prior coordination is not required. Components should ensure that inclusion of this data in a DLMS transaction does not cause inappropriate rejection of the transaction.
- 4. This transaction may be used to provide Unique Item Identifier (UII) information. Refer to the UID web at URL: http://www.acq.osd.mil/dpap/sitemap.html for DoD policy and business rules.
- 5. This revision to the DLMS Supplement (DS) incorporates Proposed DLMS Change (PDC) and Approved DLMS Changes (ADCs) listed. PDCs and ADCs are available from the DLMSO website: http://www.dla.mil/j-6/dlmso/elibrary/Changes/processchanges.asp

User Option (Usage): Used

Purpose: To transmit information in a free-form format, if necessary, for comment or special instruction

Comments:

1. The NTE segment permits free-form information/data which, under ANSI X12 standard implementations, is not machine processable. The use of the NTE segment should therefore be avoided, if at all possible, in an automated environment.

Federal Note:

Use to identify exception data associated with the transaction. Use during extraordinary situations requiring manual intervention in the requisition processing routine.

DLMS Note:

- 1. Exception data associated with the requisition is a DLMS enhancement; see introductory DLMS note 3a.
- 2. Use with Requisition Exception Data Transaction (DLA DI Code YRZ) to indicate technical/descriptive exception information or pick, pack/special delivery instructions or extended part number. See introductory DLMS note 3e.

DLMS Note:

Use with Requisition Exception Data Transaction (DLA DI Code YRZ-Line Counters 01-20) to indicate technical/descriptive exception information for procurement purposes. Segment may be repeated up to 20 times with same NTE01 qualifier. A maximum of 60 positions (including spaces) may be sent for each occurrence of the NTE01. A maximum of 1200 positions of text (including spaces) may be sent. Pick, pack, and special delivery type instructions (DLA DI Code YRZ-Line Counters 01-06) may also be entered as exception data to be forwarded to a DSS storage activity, as part of an exception MRO. This type of data is limited to 360 positions (including spaces) which would be the segment, repeated up to 6 times, with the same NTE01 qualifier. Also used for USAF descriptive data associated with part numbered requisitions (A02/A0B rp 67-80). See introductory DLMS note 3e.

PDS **Product Specification**

DLMS Note:

Use with Requisition Exception Data Transaction (DLA DI Code YRZ-Transaction Code PN) to indicate an extended part number. Only a single instance of the segment is used with this NTE01 qualifier. A maximum of 60 positions of text (including spaces) may be sent. See introductory DLMS note 3e.

DLMS Note: For DLMS use, only the following codes are authorized.

Code Name

BS Bill and Ship To

DLMS Note:

Use either this code, or both codes BT and ST, for reimbursable material. Use to identify the organization which receives both the material and the billing for the material.

BT Bill-to-Party

DLMS Note:

Use with code ST for reimbursable material. Use to identify the organization to receive the billing for material when different from the organization receiving the material. Use precludes the use of Code BS.

DA Delivery Address

DLMS Note:

- 1. Use with 2/N2/190, 2/N3/200, and 2/N4/210 to fully identify in-the-clear exception ship-to address information under authorized conditions.
- 2. Use for Requisition Exception Data Transaction (DLA DI Code YRZ-Transaction Code ST) for exception ship-to address information. See introductory DLMS note 3e.
- 3. DLMS enhancement; see introductory DLMS note 3a.
- IF International Freight Forwarder

DLMS Note:

Use for Requisition Exception Data Transaction (DLA DI Code YRZ-Transaction Code NA) Notice of Availability (NOA) address information. See introductory DLMS note 3e.

KO Plant Clearance Officer

- 1. Use when requisitioning excess plant property.
- 2. DLMS enhancement applicable to PCARSS requisitioning; see introductory DLMS note 3a.

MF Manufacturer of Goods

Federal Note:

Use to identify the manufacturer's name for nonstandard material.

OB Ordered By

DLMS Note:

- 1. Use to identify the requisitioner when the 1/N1/070 uses code ZL (Party Passing The Transaction) or Code Z5 (Management Control Activity) to identify the transaction originator.
- 2. DLMS enhancement: see introductory DLMS note 3a. Required entry for DLSS/DLMS conversion to support BSM.
- 3. For intra-USAF lateral requisitions, use to identify the routing identifier of the requisitioner (this is the same requisitioner identified by DoDAAC at 1/N101/070 Code OB).

PK Party to Receive Copy

DLMS Note:

- 1. Use as needed to identify an organization to be provided a copy of this transaction. Use with N103, qualifier M4 (Routing Identifier) and N106, qualifier To (Message To).
- 2. Must be used between Army and DLA for their integrated set assembly program, when an assembly component part being ordered by the Army is not managed by DLA, and DLA is acquiring it in support of the Army medical mission.
- 3. DLMS enhancement; see introductory DLMS Note 3a.

SB Storage Area

DLMS Note:

Use to identify the distribution depot. This is a restricted use applicable when a Service has entered into an MOA with DLA relative to Service-owned stocks, centrally-managed/stored by DLA (1/BR06/020, Code RI).

ST Ship To

DLMS Note:

Use with code BT for reimbursable material. Use to identify the organization to receive the material when different from the activity being billed for the material. Use precludes the use of Code BS.

XN Planning/Maintenance Organization

DLMS Note:

- 1. Use between Service industrial/maintenance sites and DLA to identify the Shop Service Center (SSC) associated with a requisition. Also referred to as Shop Store Identifier.
- 2. This three-digit identifier may be used in the basic requisition or in the Post-Post (DI Code COA) DLMS 511R submitted to DLA.
- 3. DLMS enhancement; see introductory DLMS Note 3a.
- Z1 Party to Receive Status

DLMS Note:

- 1. Use to identify the party to receive status when different from Service/Agency prescribed status recipient. Use multiple iterations to identify all status recipients, as required.
- 2. The DLMS provides the capability to carry additional status recipients beyond those identified by the DLSS. The Media and Status Code and the Distribution Code will be retained in the DLMS to facilitate transaction conversion in a mixed DLSS/DLMS environment. Additional status recipients identified here cannot be passed to DLSS users.

Z3 Potential Source of Supply

DLMS Note:

- 1. Use when requisitioning nonstandard material identified in PO106 only with code FT or MG to identify potential supply sources.
- 2. For intra-USAF lateral requisitions, use to identify the DoD Source of Supply (applicable when the requisition is submitted to another AF base).

Z4 Owning Inventory Control Point

- 1. Use to indicate the source of supply.
- 2. Use to indicate DLA ICP when directing the disposition of previously purchased assets. This is a restricted use applicable when a Service has entered into an MOA with DLA relative to Service-owned stocks, centrally-managed/stored by DLA (1/BR06/020, Code RI).
- 3. For intra-USAF lateral requisitions, the supply source will be another AF base (rather than the DoD "Owning ICP"). The DoD supply source/owning ICP will be identified as the potential source of supply (Code Z3).
- **Z**5 Management Control Activity

DLMS Note:

Use for submission of all GFM requisitions.

Z7 Mark-for Party

DLMS Note:

- 1. Use to identify an entity located within the ship-to address that is to actually receive the material.
- 2. Use for Requisition Exception Data Transaction (DLA DI Code YRZ-Transaction Code MF) to identify mark-for delivery information. See introductory DLMS note 3e.
- 3. DLMS enhancement; see introductory DLMS note 3a.
- ZL Party Passing the Transaction

DLMS Note:

Use only for map requisitions. Map Support Office Distribution Systems (MSODS) will enter the MSODS RI Code SD7 in requisitions returned to Defense Mapping Agency Automated Distribution Management System (DADMS) (HM8) for processing. This will indicate to DADMS that this is not the initial processing of the requisition (requisition was previously reviewed and forwarded to MSODS, which was unable to fulfill).

IAD Foreign Office

Federal Note:

Use for clear-text exception data FMS in country address.

DLMS Note:

Use for Requisition Exception Data Transaction (DLA DI Code YRZ-Transaction Code MA) For FMS in-country mark-for address. See introductory DLMS note 3e.

Semantics:

1. REF04 contains data relating to the value cited in REF02.

Federal Note:

Use the 2/REF/220 loop to provide Unique Identification (UID) information.

DLMS Note:

- 1. Use the 2/REF/220 loop in requisition transactions to supplement material identification in LIN03 of the 2/LIN/100 when requisitioning a specific item(s) identified by UID under authorized procedures.
- 2. This segment supports item identification based upon the UII or the serial number.
- 3. This segment also provides for use of a batch/lot number, when applicable.
- 4. If UII and serial number, and/or batch/lot number are required for the item, enter the UII in REF01, and enter the serial number and/or batch/lot number in the subsequent N9 segment. If UII is not used, enter the serial number in REF01 and enter the batch/lot number in the subsequent N9 segment. If only batch/lot number is required, enter the batch/lot number in REF01.
